Ultra Warehouse Announces the Arrival of Derby's New Large-Scale Cultural Venue

Derby, UK – Ultra Warehouse, a new high-capacity events venue, is set to redefine the city's live music, nightlife, and cultural landscape. Located on the edge of Derby city centre, Ultra Warehouse brings together industrial architecture, cutting-edge production, and flexible event design to create one of the Midlands' most ambitious new spaces.

Purpose-built for electronic music, live performances, brand activations, and large-scale cultural events, Ultra Warehouse offers multiple configurable spaces under one roof. The venue's flagship warehouse space accommodates up to 2,700 people indoors, supported by a secondary indoor room of 500 capacity and an expansive external yard capable of hosting daytime and festival-style events of up to 6,000 attendees.

Designed with both artists and audiences in mind, Ultra Warehouse features high ceilings, warehouse-scale rigging capacity, and production-led infrastructure suited to immersive lighting, flown sound systems, and bespoke stage builds. The venue has been developed to meet modern expectations around crowd flow, safety, accessibility, and sustainability, while retaining the raw, industrial character that defines world-class warehouse venues.

Ultra Warehouse aims to position Derby firmly on the UK touring and events map, attracting nationally and internationally recognised artists, promoters, and partners. In addition to headline music events, the venue will host daytime experiences, pop-ups, exhibitions, food and drink festivals, and private hire, supporting a diverse year-round programme.

Speaking on the launch, Co-Founder Joe Quinn from Ultra Warehouse said:

"Ultra Warehouse has been created to give Derby a venue that can genuinely compete on a national level. This is about scale, quality, and ambition – a space that works for artists, promoters, brands, and the city itself."

With strong transport links, proximity to the city centre, and a focus on safe, professionally managed events, Ultra Warehouse is expected to contribute positively to Derby's night-time economy while complementing existing cultural destinations.

Further announcements, including opening events and programming, will be revealed soon.

Location: Derby, UK
